The investment objective of the Fund is to outperform the USD Libor 1 year Index by 300 basis points per annum.

Investment Policy

The Fund will operate principally as a fund of funds and will invest predominantly in UCITS and non-UCITS open ended collective investment schemes in order to gain exposure to global equities and fixed income securities (including government and/or corporate bonds which may have fixed or floating rates of interest, 90% of which will have a credit rating of investment grade or higher by Standard and Poor's, Moody's Investors Service or Fitch Ratings Ltd) listed or traded on a Recognised Exchange. At the Investment Manager's discretion, the Fund may also invest up to 50% of the Net Asset Value of the Fund directly in equities and equity-related securities.

Essential features of the Fund:

- The Fund has the discretion to invest in a range of investments as described above.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 - 5 years.
- You can buy and sell shares in the Fund on each dealing day.
- This Class of the Fund does not distribute any income.
- Derivatives can be used for efficient portfolio management and to manage the risk profile of the Fund.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the Fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is a risk free investment.
- The Fund has been classed as 5 because its volatility has been estimated as above average. The classification is based on estimated historical data of a relevant benchmark.
- This indicator is based on historical data, may not be a reliable indication of the future risk profile of the Fund, is not guaranteed to remain the same and may shift over time.
- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- The Fund may utilise both exchange-traded and over-the-counter derivatives as part of their investment policies. These instruments can be highly volatile and expose investors to a high risk of loss.
- As the Fund has exposure to overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- For full details of the Fund's risks, please see the prospectus and supplement sections entitled 'Risk Factors' which may be obtained from the address in 'Practical Information' overleaf.
